Hamburg, PHP Unconference 2016

Dear Madam and Sir,

This year BOOT - Best Of Open Technologies e.V. is organizing for the tenth time the PHP Unconference Hamburg.

This event is designed for about 200 attendees from Germany and foreign countries. Due to the fact of the increasing interest of attendees from foreign countries the primary language will be English this year.

The target group of this event are developers and consultants, with a professional focus on web technologies and software engineering with all its tasks. Like in the last years, the organizers await many experts of the field.

Only the topics with the most interest are mostly chosen. This brought the **PHP Unconferences to a high quality level, which brought up new standards even for commercial conferences.**

We need your help to ensure that this event will be a big success again!
Our goal is to cater an all around felicitous event. You'll find the different options to sponsor the **PHP Unconference** in the attached PDF-document.

Don't hesitate to contact us for further questions.
Yours faithfully,

PHP Unconference - OrgaTeam
